

mobile X-press easyConnect features

Integration

- mere client software solution
- independent of the communication media (LAN/WLAN, GPRS/EDGE/UMTS/HSDPA, DSL, ISDN, ...)
- direct support of the modem (PCMCIA -cards require a driver installation)
 - PIN/PUK query
 - signal intensity
 - assortment of network operators
- support of embedded notebooks (integrated UMTS-module)

Intelligent connection management

- easy handling
- constantly checking for available media
- the most reasonable available medium is chosen automatically during dial-up
- current connection quality is monitored
- adjustable timeout (per connection)
- fully automated configuration of the connection for data transmission (short hold mode)

Activation of 3rd party software components (upgradeable)

- desktop
 - Cisco VPN, Checkpoint VPN, NCP, Microsoft VPN, F-Secure, SafeNet
- pocket PC
